

SunEpoxy 100

FEATURES & BENEFITS

DESCRIPTION

SunEpoxy 100 is a high performing, low viscosity, 100% solids resin system used in a variety of flooring applications. SunEpoxy 100 is a high traffic, heavy duty epoxy floor coating. The versatility of SunEpoxy 100 makes it ideal as a primer, finish coat, or aggregate binder in a wide variety of flooring applications including manufacturing facilities, warehouses, showers and food preparation.

All coats of SunEpoxy can be applied by brush or roller. An optional seeding of chips or quartz beads can be added. A second top-coat is then applied.

FEATURES & BENEFITS

- Great for areas requiring high performance and vehicular traffic
- Provides a balance of physical strength, abrasion, and chemical resistance
- Texture can be varied from aggressively slip-resistant to an "orange peel" texture
- Seamless, monolithic flooring system suitable for heavy use areas
- Withstands a wide range of elements including oils, fats, and chemicals
- Can be field or factory tinted in an array of color choices
