

SunSand

When paint alone is not enough.

SunSand

SunSand

SunSand is the concrete surfacing solution where form meets function.

SunSand combines any of the **SUNDEK** finishes with the one addition... glass beads. These fine beads are broadcast on to the surface to provide a slip-resistant environment.

SunSand provides protection against weather, salts and environmental pollutants resulting in a maintenance and economically friendly coating solution.

SUNDEK Effects such as Custom Score-line, Aggregate Effects and Masonry Effects can be added to further enhance the projects appeal.

The SunSand texture and acrylic properties are ideal for high-traffic areas such as:

- Walkways
- Pool Decks
- Balconies
- Patios
- Driveways
- Retaining Walls
- Curbing
